Introduction to class

utrains.org

Hello!

I am Serge

I am here because I want to train you to become an IT Professional (System Engineer)

What is this training all about?

Table of content

1. What is the GOAL?
2. My story
3. Frequently Asked Questions
4. How to access the course materials

“ Here are some few questions to which we will give an answer, for you to better understand what this program is all about! ”

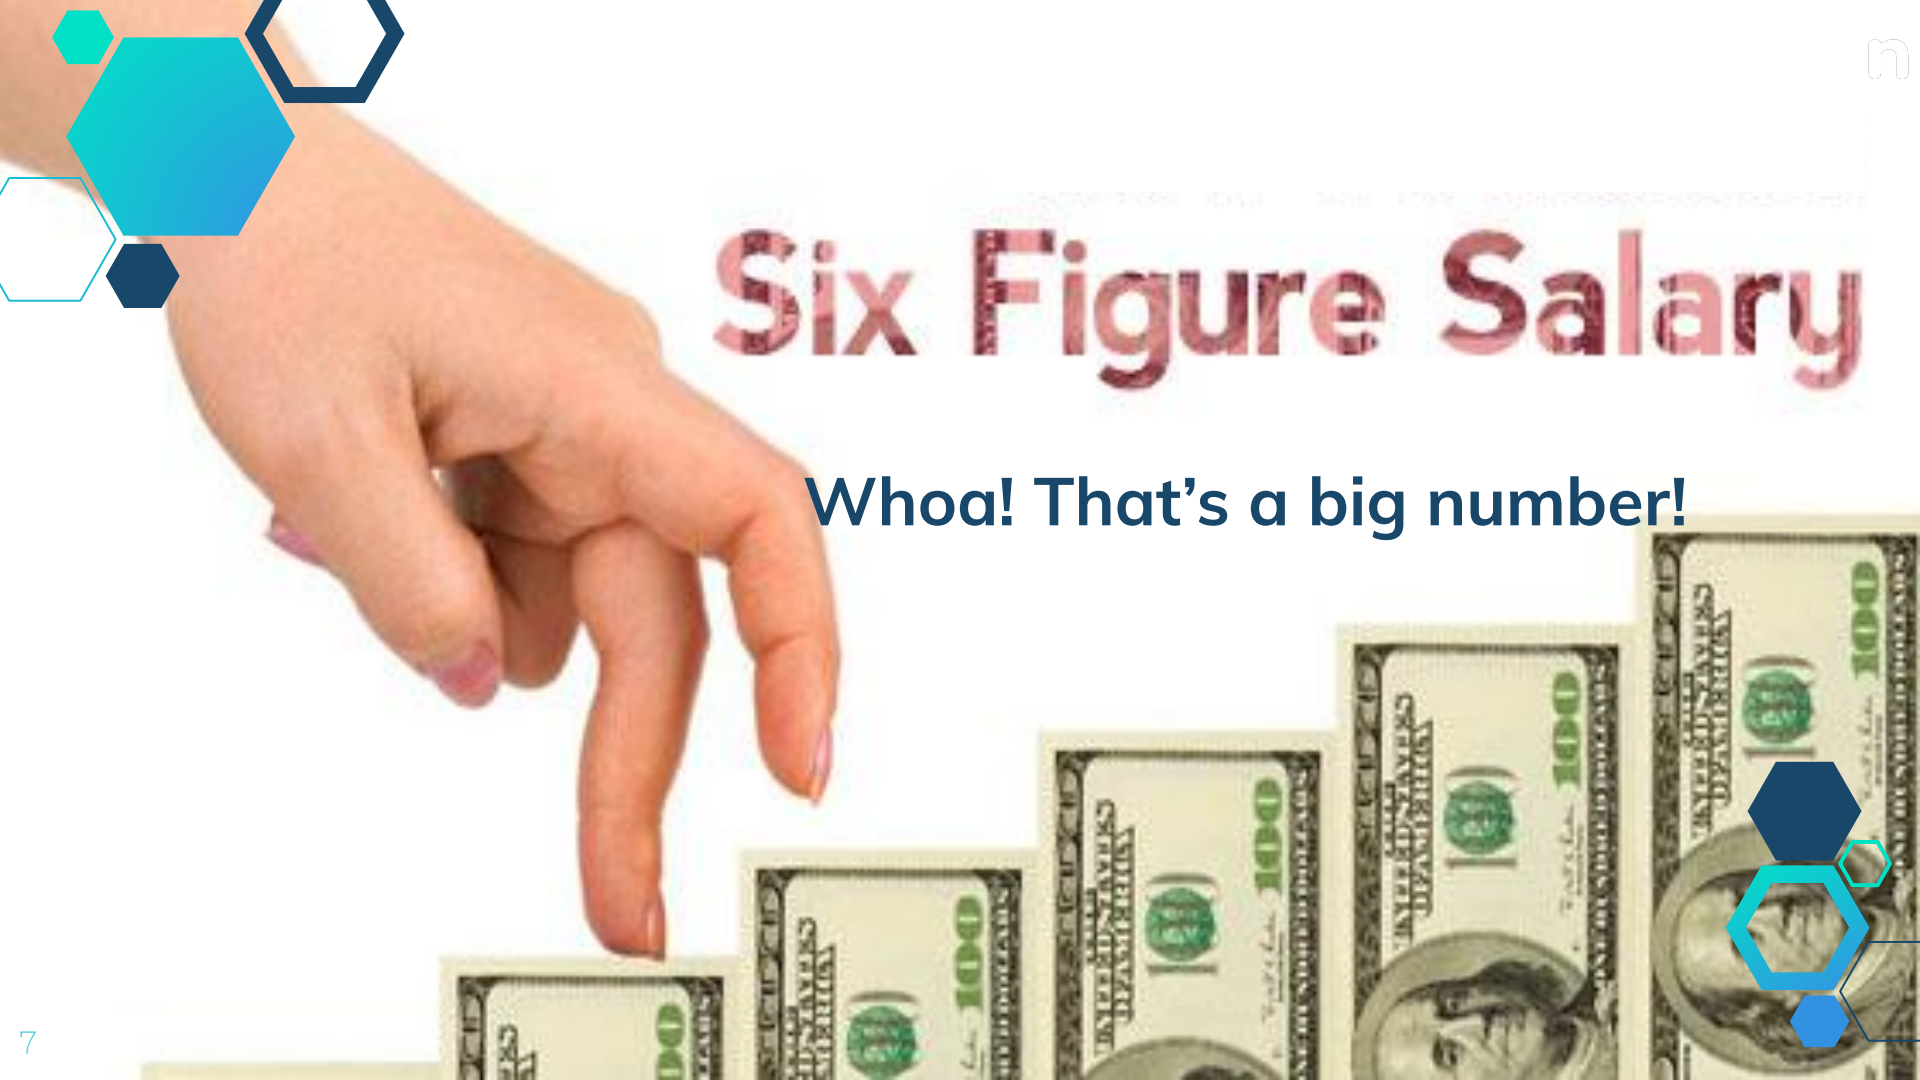
Let’s get started!

1 What is the goal?

What is the aim of this training?

Six Figure Salary

Whoa! That’s a big number!



“ Before getting there, let me tell you my story. How it all started! ”

2

My story

How it all started

Goal:
6 figures salary

How can I be paid such an amount?

Where does that money come from?

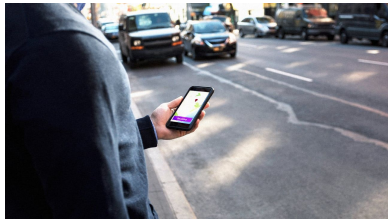
The business process

- When you work in a company where you are paid **per hour**, you get paid for **the value you bring to the company within that hour**
- To better understand this concept, let's explain it on a well know company like **Uber**
- **How does Uber work?**

Uber Driver

Sends and receives informations

Uber Data Center



Uber user

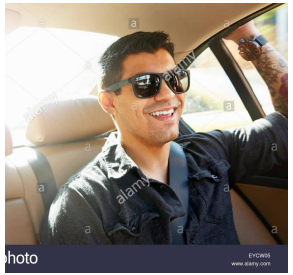
Sends and receives informations

Sends destination informations

Receives details on transport fairs for the ride

Pays transportation expenses to Uber

There are millions of users!



Uber user on a ride

Uber user at destination

Now let’s look at some possibilities

Uber Driver

Sends and receives informations

Uber Data Center

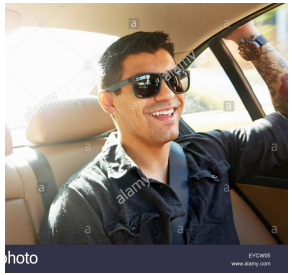
Uber user

Sends and receives informations

Sends destination informations

Receives details on transport fairs for the ride

Pays transportation expenses to Uber



Uber user on a ride

Uber user at destination

There are millions of users!

The business process

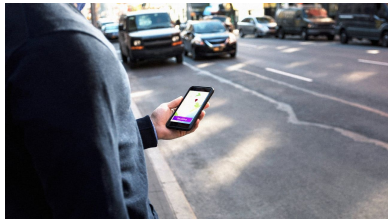
A user decides not to use Uber

- There are still **many other users that may use the app to get a ride to a specific destination**
- The **system does not have any problem**
- The company still **earns a lot of money!**

Uber Driver

Sends and receives informations

Uber Data Center



Uber user

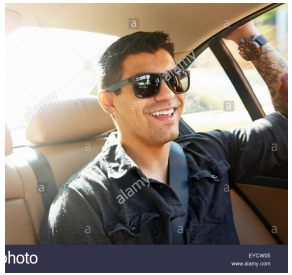
Sends and receives informations

Sends destination informations

Receives details on transport fairs for the ride

Pays transportation expenses to Uber

There are millions of users!



Uber user on a ride

Uber user at destination

The business process

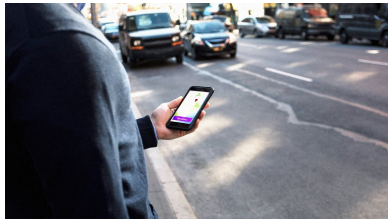
A **Driver** decides not to use Uber

- There are **still many other drivers that may use the app to give a ride to clients**
- The **system does not have any problem**
- The company still **earns a lot of money!**

Uber Driver

Sends and receives informations

Uber Data Center



Uber user

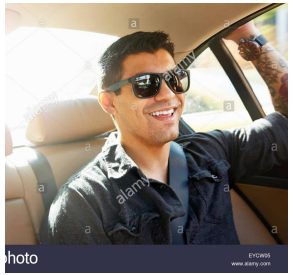
Sends and receives informations

Sends destination informations

Receives details on transport fairs for the ride

Pays transportation expenses to Uber

There are millions of users!



Uber user on a ride

Uber user at destination

The business process

The **Data Center** goes down!

- There is **no way neither for drivers to pick up clients, nor clients to get a ride using Uber**
- The **system has a big problem**. Nothing is working!
- The company **loses a lot of money!**

The business process

The Data Center: The heart of the business

- Since the data center is like the heart of the business, **it must be operational(100%) all the time**
- If it **goes down just for a while**, the company **loses a lot of money.** Just imagine Google down even for 5 minutes!
- So companies need **professionals** to take care of their Data center (Back-end).
- Thus, **they are well paid to make sure that the system don't go down even for a second**

Who are those Professionals?

IT or System Engineers

The business process

The Numeric world

- Nowadays, we are moving to the **numeric world**
- Companies make sure to have apps running and they advise their clients to get services from the apps
- The Beautiful sentence is **Click Here To Download Our App!**
- All the data from this apps are stored and processed by **servers**
- That is why, **IT professionals are more and more needed**
- **There is much money in the IT field and Africans must be part of this business Process!**

This is just a clue of the whole Business process

There is much money in the IT field
